- Team collaboration
- Problem-solving skills

Relevant Experience

Student Researcher

- Analyzed Philippine consumption trends and environmental issues
- Participated in group case studies and presentations

Achievements & Activities

- Active participant in academic group projects
- Recognized for research contributions

Comparison of Outputs

Structure and Format

- ChatGPT used a simpler and more traditional resume format.
- Gemini used a more modern structure with sections like “Professional Summary” and “Core Competencies.”

Tone and Style

- ChatGPT’s output is direct and straightforward.
- Gemini’s output is more descriptive and polished, using stronger professional language.

Content Depth

- ChatGPT provided basic and general information.
- Gemini added more detail, especially in describing skills and experience.

Clarity and Readability

- ChatGPT is easier to read quickly due to its simplicity.
- Gemini is more detailed but slightly more complex.

Analysis of Prompt Effectiveness

The prompt was clear and specific, which helped both models generate relevant outputs. However, slight differences in interpretation led to variations in structure and tone. This shows that even with the same prompt, LLMs can produce different styles depending on their training and design.

Conclusion

Both LLMs successfully generated a one-page professional resume. However, ChatGPT is better for simple and direct outputs, while Gemini produces more refined and detailed content. This activity shows that prompt engineering is important, but the choice of AI tool also affects the final result.
